SLEDGE HAMMER (10 KG)

PRODUCT DATA SHEET

DIMENSIONS & VIEW (mm)

TECHNICAL DATA SHEET

Product Name	Sledge Hammer (10 kg)
Head Weight	10 kg (approx.)
Total Weight	10 kg (approx.)
Head Material	Forged High Carbon Steel
Handle Material	Fiberglass / Composite (with rubber grip)
Handle Length	900 mm (approx.)
Head Dimensions	150 mm (L) × 65 mm (W) (approx.)
Finish	Powder Coated Head / Anti-slip Grip
Application	Heavy-duty striking, demolition, construction and industrial work

KEY FEATURES

- ✓ 10 kg heavy-duty forged steel head
- ✓ High strength and durability
- ✓ Fiberglass handle for excellent shock absorption
- ✓ Non-slip rubber grip for better control
- ✓ Balanced weight for effective striking power
- ✓ Suitable for industrial, construction and workshop use

MATERIAL & FINISH

Forged High Carbon Steel Head
(Powder Coated Finish)

Fiberglass Handle with
Rubber Grip

SUITABLE FOR

Heavy-Duty Use

GENERAL INFORMATION

Parameter	Details
Equipment Name	Sledge Hammer (10 kg)
Application	Heavy-duty striking, demolition, construction and industrial work
Construction	Forged steel head with fiberglass/composite handle
Head Weight	10 kg (approx.)
Handle	Fiberglass / composite with rubber grip
Overall Length	900 mm (approx.)

EQUIPMENT DESCRIPTION

The Sledge Hammer (10 kg) is a heavy-duty hand tool designed for high-impact striking, demolition, construction, maintenance and industrial applications. It combines a forged steel hammer head with a durable fiberglass/composite handle and non-slip rubber grip for controlled handling.

TECHNICAL SPECIFICATIONS

Parameter	Specification
Product Name	Sledge Hammer (10 kg)
Head Weight	10 kg (approx.)
Total Weight	10 kg (approx.)
Head Material	Forged High Carbon Steel
Handle Material	Fiberglass / Composite with rubber grip
Handle Length	900 mm (approx.)
Head Dimensions	150 mm (L) × 65 mm (W) (approx.)
Head Height	150 mm (approx.)
Finish	Powder Coated Head / Anti-slip Grip
Application	Heavy-duty striking, demolition, construction and industrial work

KEY FEATURES

- 10 kg heavy-duty forged steel head.
- High strength and durability.
- Fiberglass handle for shock absorption.
- Non-slip rubber grip for better control.
- Balanced weight for effective striking power.
- Suitable for industrial, construction and workshop use.

MATERIAL & FINISH

- Head: Forged high carbon steel with powder-coated finish.
- Handle: Fiberglass / composite construction.
- Grip: Textured anti-slip rubber grip.

SUITABLE FOR

Construction Sites | Industrial Maintenance | Demolition Work | Fabrication Workshops | General Heavy-Duty Use

SAFETY & MAINTENANCE

- Inspect the hammer head, handle and grip before each use.
- Do not use if the head is loose, cracked or damaged.
- Keep the striking face and handle clean and dry.
- Store in a dry location away from corrosive materials.
- Use appropriate personal protective equipment during operation.

WARRANTY

Warranty Period: 12 Months (1 Year), subject to agreed commercial terms and conditions.
